

## **SOCIAL AND BUISNESS IMPACT**

### *THE FUTURE OF UNIVERSITY DECISION MAKING WITH MACHINE LEARNING*

- ❖ **Over the last decade, universities have faced steady criticism for elitist practices such as political bias, hoarding wealthy endowments, and providing insufficient economic returns for students.**
- ❖ **Some universities are embarking on innovations to support social engagement among students, and initiating university-wide efforts to educate students for social impact.**
- ❖ **There is a chain of events associated with everything decision we make. The bigger the decision, the more life-changing the chain of events will be for the decision-maker and others around them. The impact can be positive or negative, but there is always a consequence.**
- ❖ **The main objective of this foundation is to build an integrated platform to help in imparting knowledge about various aspects including the rehabilitation of a person with a disability and to encourage the youth in working towards social welfare.**
- ❖ **They're also consulting with various NGOs for improved access to specialised education and conceptualise UG & PG programmes.**

- ❖ The university's vision is not limited to imparting knowledge about social impact but also creating a social impact by starting different initiatives and tying up with different NGOs and government-led initiatives.
- ❖ The fact that decision making plays a vital role within organizations is not difficult to understand. Decisions are clear indicators for action and many times the reason behind success or failure.
- ❖ The maintenance of stability requires universities to operate with balanced budgets, to maintain those programs which students and the public demand even though they are very costly, and to avoid disruption of programs by such things as strikes and lockouts which are disruptive to student progress
- ❖ Six generally measurable variables of effectiveness have been set out . These six factors are: productivity, morale, conformity, adaptiveness, institutionalization, and stability.
  - Productivity,
  - Morale
  - Conformity
  - Adaptiveness
  - Institutionalization  
stability.

**“The effects of decision-making change the world around us. From buying bottled water to voting against slavery and oppression, the values”**
